

Sherif Ashraf

Junior AI Engineer

01012244882 | scherifaschraf@gmail.com | [linkedin.com/in/sherifashraf2004](https://www.linkedin.com/in/sherifashraf2004) | github.com/sherif2004

Exempted from military service.

Profile

AI & Machine Learning Engineer with a strong foundation in machine learning, deep learning, and natural language processing (NLP). Skilled in designing, developing, and deploying intelligent systems that extract insights, automate processes, and enhance decision-making. Passionate about leveraging data-driven approaches and advanced algorithms to solve complex real-world problems across industries.

Education

B.Sc. in Artificial intelligence | Helwan University | 2025 | GPA 3.33 (Very Good with Honours)

Internships

Zewail University of Science and Technology | Aug 2023 – Nov 2023

- Completed foundational AI training covering machine learning, deep learning, data analysis, and computer vision; executed multiple projects demonstrating practical AI applications.

Agentic AI Engineer Program | National Telecom Institute – Hire Ready | 01/2026 – 04/2026

- Specialized in building Agentic AI systems using LLMs, LangChain, & n8n to develop autonomous workflows.
- Designed & implemented RAG pipelines, vector databases, and custom tool integration for document intelligence & NLP automation.
- Built autonomous agents with memory, reasoning, planning, and task decomposition.
- Developed LLM-powered applications and AI automation workflows.
- Completed 130+ hours of professional development in Business English, Leadership, & Project Management.

Work Experience

Micro Engineering Egypt (MEEG) – METI Company

- Data Annotator | May 2024 – Jun 2024**
Annotate images and videos for training supervised ML models.
- Reviewer and Analyst | Jul 2024 – Sep 2024**
Analyze labeling issues and contributed feedback to improve model performance.

Technical Skills

- Programming & Tools:** Python, SQL, Git, REST APIs, NumPy, Pandas, SciPy, Scikit-learn, Matplotlib, Seaborn.

- **Machine Learning:** Regression & Classification, SVM, Decision Trees, Random Forest, Boosting (XGBoost, LightGBM), Hyperparameter Tuning.
- **Deep Learning:** Neural Networks, CNNs, Transfer Learning, RNNs, LSTMs, Transformers (BERT, GPT, T5), Hugging Face.
- **Computer Vision:** Image Classification, Object Detection (YOLO, R-CNN family), Image Segmentation (U-Net).
- **Natural Language Processing (NLP):** Text Preprocessing, Word Embeddings (Word2Vec, GloVe), Sentiment Analysis, Question Answering.
- **LLMs & Agentic AI:** Large Language Models (GPT, BERT, T5), Prompt Engineering, LangChain, Agentic Workflows, Tool Calling, Memory Management, Task Decomposition, Planning & Reasoning, Retrieval-Augmented Generation (RAG).
- **Data Engineering:** Data Cleaning, Feature Engineering, Web Scraping, SQL & NoSQL (MongoDB), Data Visualization.

Soft Skills

Communication, teamwork, leadership, critical thinking, problem-solving, research writing, time management

Projects

Autonomous Data Analyst – NTI Graduation Project

- Developed an end-to-end agentic AI system enabling non-technical users to explore and analyze data through autonomous multi-step reasoning using LLMs
- Designed a modular multi-agent architecture integrating memory, retrieval, and external tools for dynamic query handling
- Built scalable and extensible workflows using LangChain and LangGraph
- Implemented advanced capabilities including Text-to-SQL and support for diverse data formats (CSV, JSON, PDF)

English Learning Assistant (VQA + Grammar Correction)

- Developed an AI-powered English learning assistant using Visual Question Answering (VQA) with a ViT-T5 co-attention model and integrated contextual grammar correction to enhance learner performance.

Aspect Sentiment Analysis

- Developed an AI model for aspect-based sentiment analysis, enabling the detection of sentiments tied to specific features or aspects within text data.

OCR Automation Bot (Telegram + n8n + Excel Reporting)

- Built an automated OCR system where users send images to a Telegram bot, which extracts text using an OCR model and processes it via n8n workflows.
- Designed the pipeline to convert extracted data into structured Excel sheets automatically and send the file back to users through Telegram.
- Integrated image preprocessing, text parsing, and data validation to improve OCR accuracy and output quality.
- Demonstrated skills in workflow automation, document intelligence, and AI-powered data pipelines.

Languages

Arabic: Native | **English:** Intermediate
