Gmail: mohamedabdallah9850@gmail.com

mobile: (+20) 1020139062

Profile:

Junior Machine and Deep Learning R&D with interests in mathematics, statistics, data science-specially ML and DL- and software Engineering to develop algorithms, discover and illustrate the current ones linking them to statistical learning theory and the human learning and use them in searching for solutions of real-life problems.

Education:

Professional Postgraduate Diploma, Artificial Intelligence Track, 9-month program (Oct. 2021 - Jun. 2022)
(*Information Technology Institute (ITI), Mansoura, Egypt*)

An internship powered by EPITA to qualify graduates in Artificial Intelligence and Data Science fields and to enhance them with the latest technologies.

Faculty of Engineering – Mansoura University (Oct.2016-Jul.2021)

Bachelor's degree in Electronics and Communication with A+ graduation project.

Overall grade: 84% - *Excellent with honors* (ranked as 15th).

- *Graduation Project:*

Deep Learning Based-Communication System: Developing an *end-to-end communication* system based on the autoencoder structure to **reproduce transmitted signals** at the receiver.

- *Publication:*

Conference Paper: “Recurrent Neural Networks for Pilot-aided Wireless Communications”, published in the 2021 38th National Radio Science Conference (**NRSC2021**) with state-of-the art results in the mentioned communication problem described in the graduation project (<https://ieeexplore.ieee.org/document/9509815>)

Courses and Basic Knowledge:

- Deep Learning (book) for: Ian Goodfellow, Yoshua Bengio, and Aaron Courville (9 chapters finished).
- Deep Learning Specialization, Coursera.
- Stanford CS229: Machine Learning.
- MIT 6.S191: Introduction to Deep Learning.
- Convolutional Neural Networks for Visual Recognition, CS231n.
- Introduction To Computer Science and Programing Using Python, MIT.
- Matrix Methods in Data Analysis, Signal Processing and Machine Learning, 18.065, MIT.
- Probabilistic Systems Analysis and Applied Probability, 6.041, MIT.
- Linear Algebra, 18.06, MIT.
- Differential Equations, 18.02, MIT.
- Data Base Fundamentals, Mahara-Tech.

Technical Skills:

- **Programming:** Python - C++ - SQL.
- **Frameworks:** TensorFlow-PyTorch(moderate) -Scikitlearn -PostgreSQL(moderate) -MongoDB(beginner).
- **Libraries:** Pandas – Matplotlib – NumPy – SciPy – Plotly – Dash – PySpark – Seaborn – OpenCV.

Training Experience:

- **Amazon Web Services (AWS) Serverless 101 Workshop:** at ITI-Smart Village on 3 Jul.2022
- **Fundamentals of Deep Learning Workshop:** By NVIDIA Deep Learning Institute(DLI) at ITI-Mansoura Branch on 2 Jul.2022
- **Summer Training:** at IT center- Mansoura University between Sep.2020 and Oct.2020

Languages:

- **Arabic** (Native)
- **English** (Very Good)
